[Smart Array P410i License Key 12](#)

HP Smart Array Advanced Pack

About SAAP

SAAP is a collection of additional and advanced controller features embedded in the firmware of select Smart Array controllers. For more information on the current features available through SAAP, see the HP website (http://h18004.www1.hp.com/products/quickspecs/13200_div/13200_div.pdf).

To access SAAP features for HP Smart Array G6 or G7 controllers, you must purchase a license key from HP. To obtain a license key, see the SAAP product page on the HP website (<http://www.hp.com/go/SAAP>). A license key is not required to access SAAP features on HP Smart Array Gen8 controllers.

To install the license key and activate SAAP, use one of the following methods:

- Installing a license key with HP SSA CLI ("Entering or deleting a license key" on page 55)
- Installing a license key with HP SSA Scripting ("LicenseKey, DeleteLicenseKey" on page 79)

Some SAAP features are required for advanced configuration tasks in HP SSA. For a list of these tasks, see "Support for configuration tasks (on page 6)."
